MICROCALIBIR
COMPACT UNCOOLED LWIR CORES

TELEDYNE

03-032-25006-00

QUICK-START GUIDE

1. Gently plug-in USB interface (IF) board to the back of the camera core.
2. Install the two Phillips screws at the back of the USB IF board.
   Note: Do not fully tighten one screw then the other as this may cause torsion and damage the board.
   a. First apply light torque to both screws to ensure the board is properly set in place.
   b. Then apply slightly more torque to tighten.
3. Plug the USB-C cable into the USB-C socket on the board.
4. The camera should appear as a new USB mass-storage device (listed as the serial#). The camera user manual is available on this new drive.
